## Project Notes

As an agent for Skyspan Umbrellas, Central Industries were engaged to install a custom made single skin, triple post umbrella at the renovated Mount Druitt Swimming Complex. Installed in a single day, the pool remained open at all times during the installation and patrons now benefit from shade whilst waiting for their turn at the blocks.

Central Industries takes the business of shade and sun protection in our extreme weather conditions seriously. Skyspan Umbrellas are architecturally designed and engineered to ensure stability and durability in our extreme weather conditions, including UV protection and a wind rating certification of up to 148km/hour.
